Activity 1: Ethical Values and Principles

This activity is designed to get you to reflect on which ethical principles and priorities matter most to you in the context of digital mental healthcare.

In the grid to your right, you will be able to add sticky notes in order to share your thoughts on each of the following questions:

- 1. What ethical values and principles matter to you?
- 2. What are some positive use cases for digital mental health technologies?
- 3. What are some negative use cases for digital mental health technologies?

As described during the presentation, we want to learn more about your priorities for digital mental health and so feel free to use the sticky notes to describe whatever priorities come to your mind.
